PROFILE

As a budding software developer, my passion lies in creating applications that are both efficient and user-friendly. Seeking a challenging opportunity where I can contribute my coding skills and problem-solving abilities to real-world software projects while continuously learning and growing.

PROJECTS

● Calculator Application (Java-Swing)

- A desktop calculator built using Java Swing. It supports basic arithmetic operations with a user-friendly interface.

● BMI Calculator Application (Android Studio-Java)

- An android mobile app that calculates Body Mass Index based on user height and weight. Displays a basic health result such as "Normal", "Under-weight", "Over-weight".

● To-Do List Application (Java-Swing)

- A task management app that allows user to add, delete and mark tasks as completed. Built with java swing for the front-end interface.

● Student Marksheet Generator (Python-CLI)

- A simple command line app to input student marks, calculate total, average and display the grade.

● Quiz-Game (HTML, CSS, Javascript)

- A web-based multiple-choice quiz game. Shows score after all questions are answered. Built with HTML, CSS and Javascript.

● Daily Dev Drills Application (Flutter, Firebase)

- A mobile app that helps users improve their programming skills by practicing coding problems.
- User Module: Sign up, Log in, View and solve the problems by different levels
- Admin Module: Add, Edit and Delete questions. View student Progress
- Backend: Firebase realtime database used to store questions and user data.
